PREFACE.

In preparing the present edition of my Seed Catalogue, my desire has been to give a selection of the choicest flowers, avoiding the long list of names usually given in catalogues, a great part of which are of no value in our climate; whilst a still larger portion are nothing better than weeds. Having been engaged over thirty years in growing and harvesting seeds—flower and vegetable—I flatter myself I can safely select the finest varieties, and such as cannot fail to please amateur cultivators, as it is very difficult for an inexperienced person to select from the long lists usually given. Being extensively engaged in importing and growing the new and rare plants and florist flowers, it will be readily seen that my facilities for saving seed of the choicest description are unsurpassed; the seeds are of a quality which only growers alone can offer. Whilst such articles as it is necessary to import are received direct from the first growers in England, France and Germany.

JOHN SAUL,
*621 Seventh St., opposite U. S. Patent Office,
Washington, D. C*

CULTIVATION.

Flowering plants are from various parts of the world—temperate and tropical—and their habits are as various. Some are found on mountains, others in rich moist valleys; and again on arid plains; it follows that their treatment must be very dissimilar, and that it is not in the province of a catalogue to give any lengthened cultural directions. I will only offer a few general remarks on seed sowing:

In this latitude (Washington) nearly all the hardy annuals can be sown in April, say from first to middle, considering the season, and the condition of the ground; whilst the more tender varieties—natives of warmer climates—should not be committed to the ground before the middle of May. Such tender plants as Double Zinnias, Clanthus Dampierii, Cypress Vine, &c., should not be sown before the latter season, as they are natives of warm climates, and when sown early, and the ground cold, they frequently perish. When this occurs, the blame is of course placed on the seedsman; when, had they been sown in proper season, success would be certain. As many flower seeds are very minute, it follows when sown they should be covered very lightly, just sufficient to cover the seeds. Small delicate seeds may be advantageously covered with damp moss when sown, but in such cases they require to be carefully watched, and the moss removed as the seeds vegetate, without exposing too suddenly to bright sun or drying winds.

All Flower Seeds Sent by Mail, Postage Free.

For the convenience of persons unacquainted with plants, I have for some years put up the following collections, which are varied to suit different latitudes; they have invariably given the greatest satisfaction.

Collection of Flower Seeds.

BEAUTIFUL NEW PLANTS.

Primula Japonica—Queen of Primroses.

The "FLORIST" says of it—"It is just ten years since Mr. Fortune met with it in Japan, a basketful of blooming plants having been brought to his door; they were, of course, secured, but the journey home was too much for them, and despite every care none reached England alive. Ever since that time endeavors have been made to introduce this lovely plant, but till now without success, the seeds having been found to lose their germinating powers in the course of transmission to Europe. At last, however, perseverance has been rewarded, and from seeds imported by Mr. Fortune, plants have been raised in the establishment of Mr. W. BULL, of Chelsea. Our gardens have thus secured a perfectly new, thoroughly hardy, and exquisitely lovely Primrose, one which is really valuable on account of its intrinsic beauty. Of the hardiness of the 'Primula Japonica,' there can be no doubt, since plants which have been standing all the winter, fully exposed, in the trying atmosphere of London, are perfectly healthy, and came into bloom about the middle of May, some two or three weeks later than the plants which had been potted and flowered under glass."

Fine new seed saved from our fine collection. Price per packet 50 cts.

Celosia Huttonii.

This very beautiful plant is of compact pyramidal form and bushy habit, profusely branched, each leading branch being tipped with a small spike of bright crimson flowers.

In color the plant resembles the well-known *Iresine Lindenii*, the upper surface of the leaf being of a deep claret color, while the under side is of a bright crimson shade. It grows to a height of about $1\frac{1}{2}$ to 2 feet, by about $1\frac{1}{2}$ feet in diameter, the leaves measuring 3 to 4 inches long by $\frac{3}{4}$ to $1\frac{1}{4}$ inch wide at the broadest part.

As a Bedding or Sub-tropical Plant it will take a high rank, from its fine habit and rich and effective coloring. Although generally treated as a half-hardy annual, plants which have been bedded out during the summer retain their fine bright color till late in the autumn, a bed of it being on October 29th, in full beauty in the Chelsea Nursery, having withstood late severe frosts without any protection.

Plants propagated by cuttings taken off in early summer, make splendid objects for greenhouse decoration during the winter months.

Price per packet 50 cts.

Campanula Medium Calycanthema Alba.
Campanula Medium Calycanthema Cœrulea.

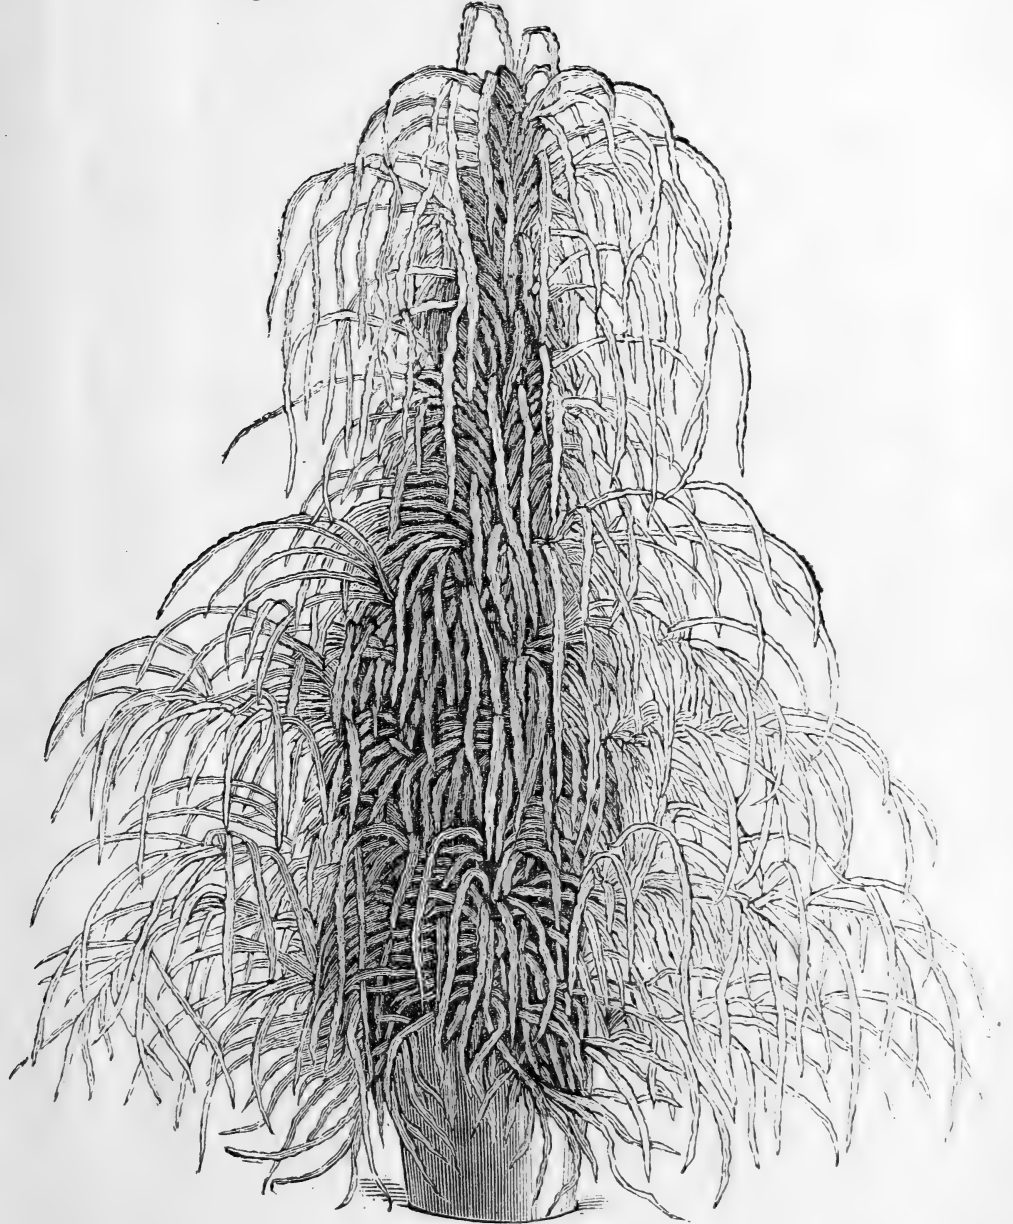

These splendid biennials are almost unrivalled for their brilliant effect in the flower garden, and as single specimens for conservatory decoration, it is scarcely possible to over-estimate their value. In habit the plant differs but little from the well-known form of the old blue and white Canterbury Bell, but while the corolla is much larger, the calyx, in addition, is enlarged to nearly four inches in diameter, presenting the form of a saucer, and changed from its ordinary green color to the same as that of the corolla, thus adding considerably to its beauty. The fact of its coming true from seed renders it easy of access, placing it within reach of all amateurs and lovers of their garden.

Price per packet 50 cents.

Amaranthus Salicifolius.

This very beautiful and graceful plant, which we offered for the first time in 1872, has given universal satisfaction, having succeeded better—developing its beauty more fully—in our warm climate than it was found to do in the cooler climate of England.

The plant is of pyramidal form, attaining a height of from $2\frac{1}{2}$ to 3 feet, branching close to the ground, the lower branches being from 12 to 15 inches in length, and extending in a horizontal position.

The leaves, which are beautifully undulated, vary in the earlier stages of growth, from a green to a bronzy green shade, and are from 5 to 7 inches in length, by about a quarter of an inch in width. As the plants get stronger, the leaves at the ends of all the principal branches assume a bright orange red color and become more elongated, generally being from 10 to 15 inches in length, forming magnificent bright colored plumes, and giving the plant a most elegant and picturesque appearance.

From its extremely graceful habit and rich colors, this plant produces a striking effect when planted in large beds or masses; it also forms a very handsome object as a single specimen for the centre of a vase or small bed, and is invaluable as a pot plant for autumn greenhouse decorations.

Price per packet, 25 cents each.

FLOWER SEEDS IN COLLECTIONS.

	each.
Aster, quilled German, coll. of 8 distinct var.....\$	75
dwarf Chrysanthemum flowered, coll. of 6 distinct var.....	75
These Asters are of the very finest description and have taken the first prizes at almost all the Exhibitions where they were shown.

Oats animated (Avena Sterilis).....	10

SELECT VEGETABLE SEEDS.

In offering to the public my stock of garden seeds, I do so with great confidence; all are new, fresh and of the finest description. Such varieties as are best grown in this country, are either grown by myself, or by experienced growers, by contract for my trade; whilst those varieties it is necessary to import, I receive from the most reliable growers in England and the continent.

All garden seeds will be pre-paid by mail at the prices quoted, except those marked * for which 15 cents per quart, or 8 cents per pound must be added for postage; when this is omitted, an amount equivalent to the postage will be deducted from the order.

From these prices there is no discount.
